

TRILINEAR
INFRATECH

[*Power of Forecasting
the Uncertain*]

{ ABOUT US }

Trilinear Infratech is an Engineering Consultancy and we take our client's challenge as our own. As engineers, scientists, managers, and technical specialists, we at Trilinear Infratech have one vision, and that is to see the possibilities in our clients' objectives and make them happen, whatever may be the challenge and do this in a manner that is rewarding to all.

We provide Analysis and Design Solutions for Architects, Developers, Contractors and Infrastructural companies. Our team specializes in the area of Buildings (RCC & Steel), Water & Waste Water Treatment Plants, Bridges and Industrial Structures. We have a significant experience in Peer Review, Value Engineering & Structural Audits for old & new Buildings.

OUR CLIENTS

Jumeirah Towers, Mokila (D.N.B. Constructions)

{ THE TELLING BRAND STORY OF TRILINEAR INFRATECH }

The name Trilinear indicates the Three linear planes (X, Y & Z) which explains every 3-dimensional objects .

Engineering is the formula with which we solve the 3-dimensional world problems using science as the base theory. Being an Impeccably trained unit, we have the ability to create advanced, systematic and intricate system of solutions.

Our team is driven by the challenge, and we take our clients challenge as our own. At Trilinear, we appreciate what clients do and the responsibility they shoulder on us. Hence, all of us believe that we have the ability to deliver a little better each day.

{ HOW DO WE DO IT }

A nation on the road to development requires to be fuelled appropriately by civil and industrial infrastructure, with products and services. Hence, our in-house team works to develop projects which are Safe, Economic and Easy to execute. We follow a 5-level approach which begins with Understanding the problem statement, Framing solutions, Analysing Solutions, Designing and lastly optimizing the designs.

Giving holistic solutions for a given problem with an array of advanced analysis techniques such as Finite Element Analysis and ensuring that we establish a complete range of Structural Behaviour for our clients.

VISION & MISSION

Missions:

To demonstrate our multiple abilities which enables our clients to execute any project and serve the nation with pride.

To build a strong future ensuring increased support to associates.

Our vision is to be a world-class consultant and a tech solution enterprise committed to quality, timely completion, client satisfaction, continuous learning and enhancement of employee's value.

SERVICES OFFERED

We provides a variety of services in the field of design engineering so one can expect a quality result.

A. Structural works:

1. Buildings:

- ◆ Residential Villas
- ◆ Commercial (RCC & Steel)
- ◆ High-rise Buildings

2. Industrial Structures

- ◆ Convention centres
- ◆ Warehouses
- ◆ Factories

3. Infrastructure

- ◆ Water Treatment Plants
- ◆ Sewage Treatment Plants
- ◆ Railway Bridges
- ◆ Culverts
- ◆ RCC Bridges
- ◆ Foot over Bridges
- ◆ Toll Plazas

4. Façades (Aluminium & Steel)

B. Water and Environmental works:

1. Water Supply schemes:

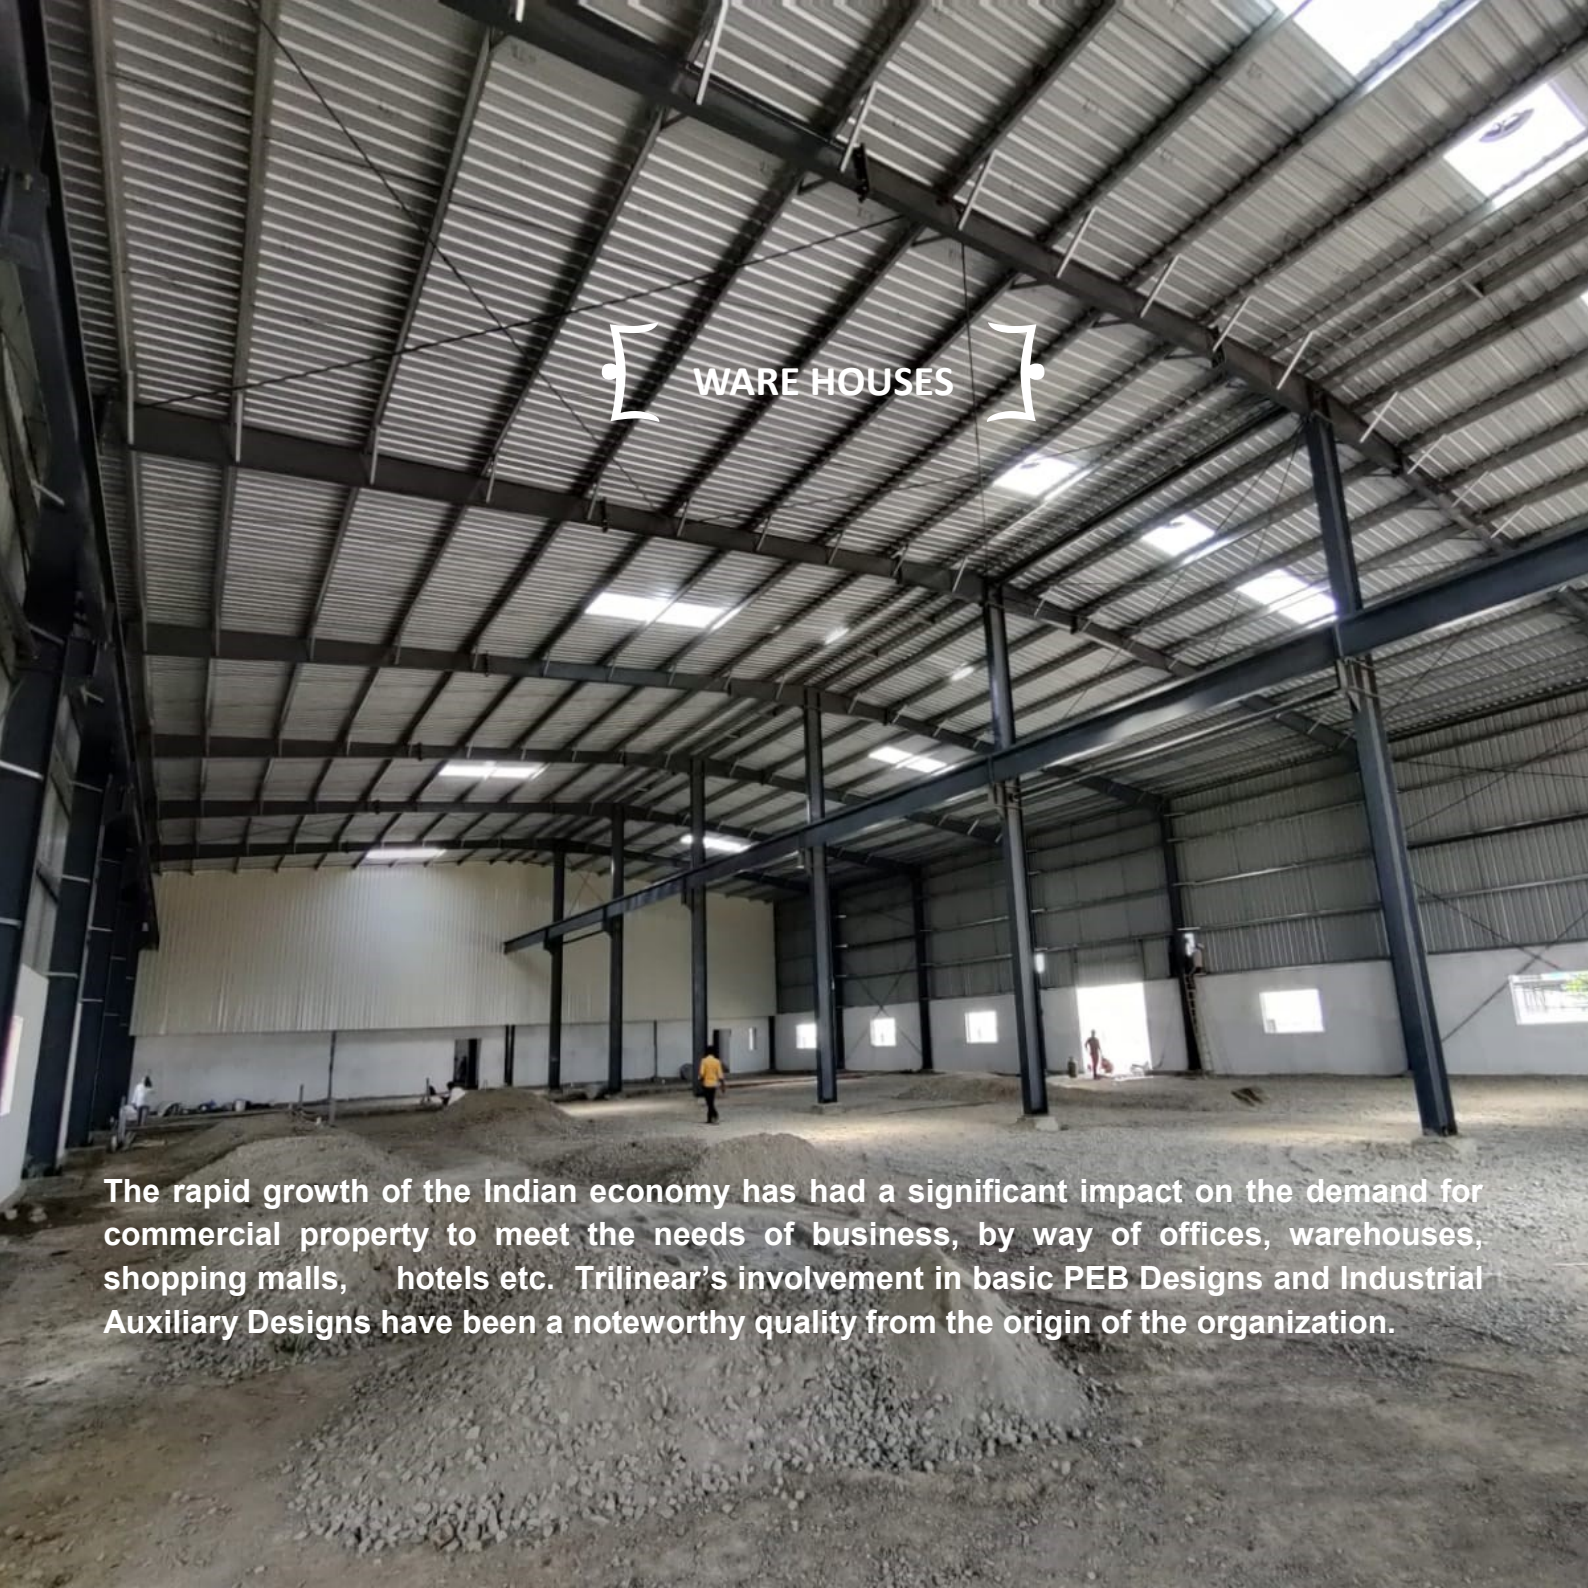

- ◆ Surface water Intake Type
- ◆ Ground water Intake Type

2. Tender Support:

- ◆ Component Designs
- ◆ Estimation & Costing

C. Peer review & Due Diligence works:

- 1. Peer Review of Structural & Hydraulic Designs and Drawings**
- 2. Value Engineering**
- 3. Rehabilitation & Retro-fitting Designs for Old Structures**
- 4. Redesign of Existing schemes for performance enhancement**

[WARE HOUSES]

The rapid growth of the Indian economy has had a significant impact on the demand for commercial property to meet the needs of business, by way of offices, warehouses, shopping malls, hotels etc. Trilinear's involvement in basic PEB Designs and Industrial Auxiliary Designs have been a noteworthy quality from the origin of the organization.

[WATER PROJECTS DEALT]

- **Complete Survey, Technical assessment, DPR Preparation, STA approval, Institutional Vetting, Structural Analysis & Design, Good for Construction Drawing Preparation and PMC approvals for structures is done under Rural Drinking water & Sanitation Division (RDWSD), Karnataka for**
 - * **Ambli Multi Village Scheme with Tungabhadra reservoir, Hosakota as the source, supplying water to Ambali and other 9 habitations through extension of pipe line from existing MVS scheme Sonna, Basarkodu, and others 51 villages in Hagari Bommanahalli Halli taluk in Vijayanagara district.**
 - * **B.D.Halli, Meenahalli & Handihala Multi Village Schemes (3 Nos) Supplying water to B.D. Halli And Other 07 , Meenahalli And Other 03 And Handihal And Other 01 Villages In Bellari Taluka of Bellari District.**
 - * **New Multi Village Scheme for supplying water to Jeeral & other 17 Habitations of Koppal District.**
 - * **Augmentation of existing Kudla Multi Village Scheme supplying water to Kudla and other 5 Villages in Hanagal Taluk of Haveri District.**
- **Tender Technical Designing and Detailing with Department presentation under RDWSD, Karnataka for**
 - * **Magadi-Ramnagara Multi Village Scheme with Manchanabele reservoir as the source, supplying water to 625 habitations of Magadi taluk and 250 Habitations of Ramanagara taluk in Ramanagara district.**
 - * **Sannathi Multi Village Scheme which is supplying water to 70 habitations of Chittapur taluk in Kalaburagi district.**
 - * **Bedsur Multi Village Scheme which is supplying water to 95 habitations of Chittapur taluk & Kalagi Urban in Kalaburagi district.**
 - * **Motebennur Multi Village Scheme which is supplying water to 15 Villages (18 Habitations) in Byadagi Taluk in Haveri district.**
 - * **Karlger Multi Village Scheme which is supplying water to 37 Villages in Ranebennur Taluk in Haveri district.**
 - * **Kudrihal Multi Village Scheme which is supplying water to 26 Villages in Ranebennur and Byadagi Taluks in Haveri district.**
 - * **4 Packages in Mandya District Supplying water to 771 Habitations in Mandya Taluk, Maddur Taluk, Srirangapatana Taluk & Malavalli Taluk.**

Impounding Reservoir with LDPE Geomembrane sheet for B.D.Halli MVS Schemes Package in Bellary District, under RDWSD Karnataka

[WATER PROJECTS DEALT]

- Bulk Main from Hemavathi River Near Kudalu Kuppe to Favorich Mega Food Park for supply of commercial water for food processing plants.
- Mydukuru to Kopparthi Bulk water Main for industrial water supply under APIIC, Vijayawada.
- New Single Village Schemes (SVS) under SWSM, Uttar Pradesh for
 - * 193 Villages (114 DPRs) in Chandauli District.
 - * 275 Villages (111 DPRs) in Ghazipur District.
 - * 307 villages (163 DPRs) in Farrukhabad District.
 - * 189 Villages (104 DPRs) in Bijnor District.
 - * 84 Villages (54 DPRs) in Saharanpur District.
 - * 46 Villages (30 DPRs) in Kanpur Dehat District.
 - * 163 Villages (54 DPRs) in Deoria District.
- Re-organisation of Existing schemes under SWSM, Uttar Pradesh for
 - * 289 Villages (36 DPRs) in Ghazipur District.
 - * 36 Villages (18 DPRs) in Bijnor District.
 - * 99 Villages (62 DPRs) in Saharanpur District.
 - * 22 Villages (14 DPRs) in Muzzaffarnagar District.
- Augmentation of Approved SVS schemes under SWSM, Uttar Pradesh for
 - * 118 Villages (38 DPRs) in Jaunpur District.
- Mancheri Bulk main (6.5 km) from Godavari river near Seetharampalle rural to WTP including Intake and Jackwells.
- Structural Analysis and Design of Intze type Elevated Water Tanks (16 Nos) in Sala, Janua District, Uttar Pradesh.
- Structural Analysis and Design of Rapid Sand Gravity Filter House for 100 MLD WTP in Sagar, Madhya Pradesh.

**Water Supply Campus for SVS Scheme in
Chandauli District, Uttar Pradesh under
SWSM Phase-2**

BRIDGES

Our familiarity lies in handling Foot Over Bridges (FOB's), Rail Over Bridges (ROB's), Approach Bridges & Box Culverts.

Trilinear Infratech has encountered with the most challenging Foot Over Bridges which ranges from 20 to 50 meters.

{ FAÇADE DESIGN }

We are very much concerned and give importance to our services where our design can bring value added services to our Developers, Building Owners, Architects, Project Management Consultants (PMC), & Building Contractors with cost effective design solutions.

Our Main focus is on maximizing design optimization and aesthetical improvements without compromising design intent and technical specifications with energy efficient solutions.

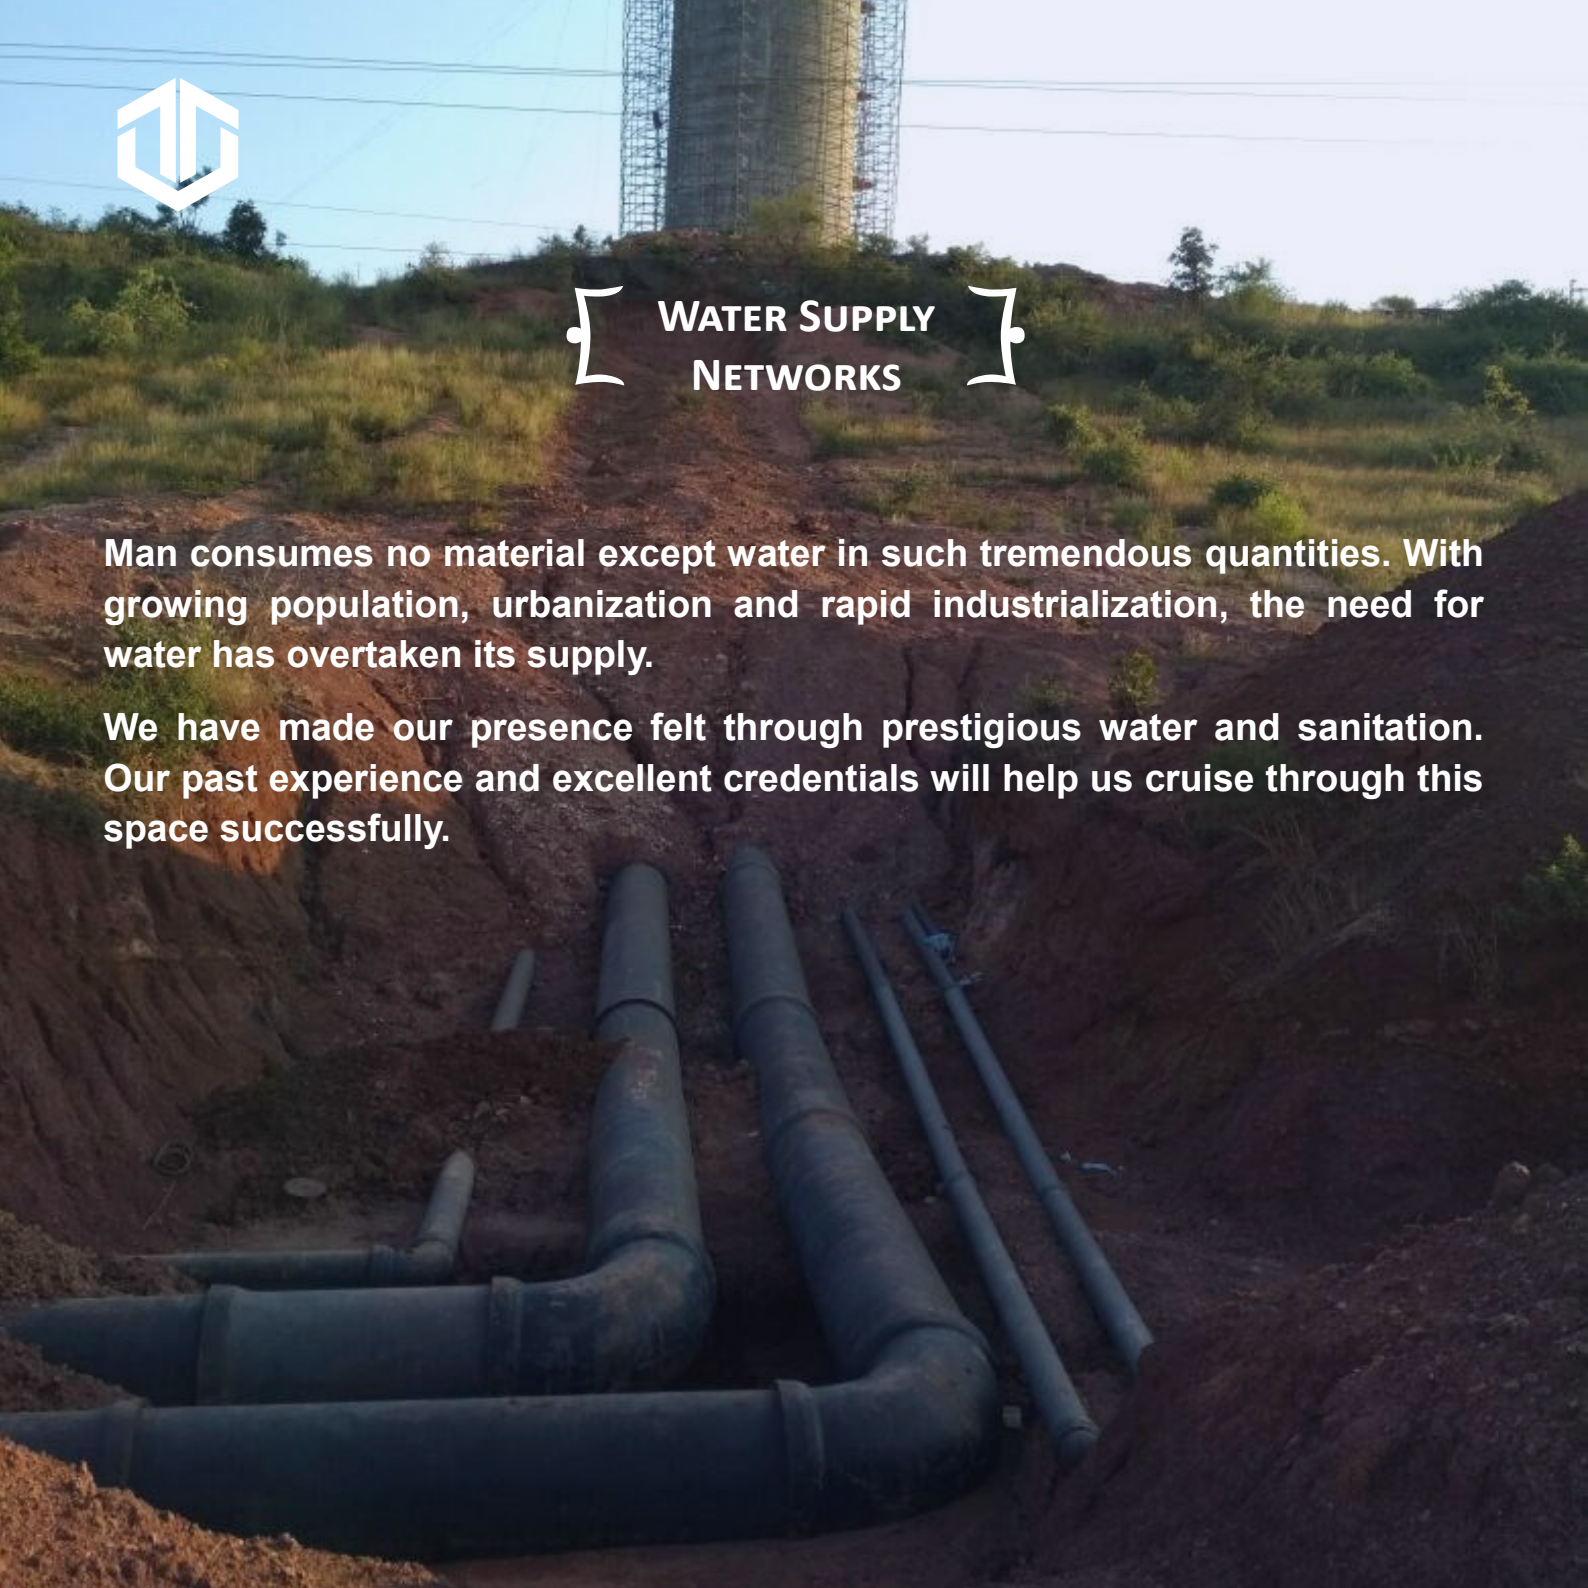

{ WATER SUPPLY NETWORKS }

Man consumes no material except water in such tremendous quantities. With growing population, urbanization and rapid industrialization, the need for water has overtaken its supply.

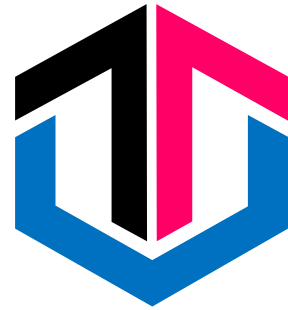

We have made our presence felt through prestigious water and sanitation. Our past experience and excellent credentials will help us cruise through this space successfully.

{ TOLL PLAZA }

A strong transportation network paves the way for better connectivity. Roads are an integral part of the transport system. Toll plazas are the representing entities in any road network.
